

The table of nine

The children are playing a board game and each child needs nine counters. How many counters will be needed by two, four, six and eight children?

Complete.

2.

$5 \times 9 = \square$

$4 \times 9 = \square$

$8 \times 9 = \square$

$9 \times 9 = \square$

3.

$7 \times 9 = \square$

$3 \times 9 = \square$

$6 \times 9 = \square$

$1 \times 9 = \square$

4.

$\square \times 9 = 18$

$\square \times 9 = 45$

$\square \times 9 = 90$

$\square \times 9 = 9$

5.

$\square \times 9 = 72$

$\square \times 9 = 27$

$\square \times 9 = 63$

$\square \times 9 = 36$

6.

$\square \times 9 = 54$

$\square \times 9 = 45$

$\square \times 9 = 18$

$\square \times 9 = 81$
